ÍTALO CARVALHO

Ítalo Boss Lima Carvalho | Married | 27 years old

As a developer for eight years, I worked with several languages, but I specialized and worked longer with Java.

However, looking at market changes, I realized that mobile development would be a good area to be followed. Therefore, I found in iOS development the enthusiasm and motivation to continue my career.

Skills

iOS

Swift

Objective-C

CD

Unit Tests

MVC

MVVM

RxSwift

Mobile

UI Design

Ionic

Javascript

CSS

Versioning

Git

Git Flow

Back-end

Java

PHP

Laravel

PostgreSQL

MySQL

Methodologies

Scrum

CBL

Languages

Native Portuguese

Intermediary English

Soft skills

Team Work

Presentation

Positive attitude

Creativity

Work Experience

iOS Developer
Cetelem
January/2020 - Now

Support and implementation of new features of the iOS Application, using Swift language with MVC and MVVM standards and Infrastructure and Security layers. The application also consumes REST API, as well as use of Analytics tools, Push Notification, error reporting, encrypted local database and cache.

iOS Developer
Apple Developer Academy
July/2018 - December/2020

Scholarship in Application Development Project for Apple platforms (iOS, watchOS and tvOS), learning Swift and the basis of Objective-C. Using the CBL (Challenge Based Learning) methodology to build applications, ranging from finding a problem to ideation and development of the proposed solution, including design, business model and architecture and software engineering. Through the projects, the use of SCRUM, Version Control with Git and Git Flow, Unit Tests and Continuous Integration are applied, in addition to the MVC and MVVM standards.

iOS Developer
Mercadapp
July/2019 - December/2020

Support and increment of the iOS application, using the whitelabel model for companies. Application developed in Swift with MVC standard and consumption of REST API, use of dependencies for telephone validation and online payment.

FullStack Developer
Urbis
August/2018 - July/2019

Fullstack developer in the maintenance and development of the web system, using Laravel (PHP) and PostgreSQL, in addition to Javascript and CSS. Construction of RESTFUL API with Laravel for consumption of mobile application developed with the hybrid tool TotalCross.

Team Leader
Cognus
October/2017 - July/2018

Leadership of a mobile development team, composed of 4 people, in the construction of 2 projects: Puntu and EuSA. Both using hybrid development in Ionic and NodeJS with PostgreSQL database to build a RESTFUL API service.

Java Developer
CSI Eventos
June/2012 - October/2017

Development and maintenance of an ERP system, built in the Java language (SE 7), using the MySQL database, Hibernate (JPA), GIT version control and reporting with JasperReport. Systems integration using WebService REST.

Freelancer

Development of websites based on Wordpress (HTML, CSS, PHP and Javascript). Front-End Development (HTML, Bootstrap and JS) with Back-End integration. Development of Web Sales and Inventory Control System with Java Back-End (VRaptor 4 with Hibernate and REST Standard) and Front-End in Angular 2.

Education

Sistemas e Mídias Digitais
Universidade Federal do Ceará
2014 - 2018

The Bachelor's Degree in Digital Media and Systems aims to form bachelors with specialized knowledge in two main main areas: Multimedia Systems and Digital Media.

Computer Technician
Instituto Federal do Ceará
2008 - 2012

High School and Professional Technical Training Course. Training in systems development, building websites, working with operating systems, databases and computer networks.

Courses and achievements

The Apple Worldwide Developers Conference
San Jose - Califórnia
2019

I was selected for WWDC Scholarships to participate in the annual developer event for Apple platforms. The opportunity ensured contact with Apple Engineers, visibility of developer apps on the App Store, live lectures on launches and contact with developers from around the world.

iOS Foundation
Apple Developer Academy
2017

Introductory iOS Development course, covering the primary concepts of iOS, aiming to produce an application at the end of the course period.
